

# Delivering Value Together for the AX User Community

Sessions led by eBECS and AXtension at AXUG Summit 2014

## Understanding Lean Manufacturing with Dynamics AX 2012

See Lean Manufacturing inside Microsoft Dynamics AX 2012 in action. Don't miss this overview of the Lean functionality in the standard Microsoft Dynamics AX 2012, as well as demonstrations to show a few of the major building blocks of Lean Manufacturing for AX 2012.

**Wed 15 Oct**  
15:45-16:45  
Room 124

## Leveraging the Microsoft Stack for Robust BI

Deploy the power of the Microsoft stack to reach new heights with your BI initiatives. In this presentation, you will learn about the components of the Microsoft stack, that when deployed with Microsoft Dynamics AX, provide a robust infrastructure to meet your BI and reporting requirements.

**Thu 16 Oct**  
10:45-12:00  
Room 106

## Utilizing BI techniques & Tools for AX Project Data Management

Learn how to improve data qualification, categorization, cleansing, and migration utilizing Business Intelligence tools and techniques, helping to ensure a successful Microsoft Dynamics AX implementation.

**Thu 16 Oct**  
14:00-15:00  
Room 127

## Combining AXtension & eBECS to Improve Manufacturing Practices

AXtension and eBECS will jointly present how to make the production process more flexible, shorten time-to-market, cut costs and allow manufacturers to fulfill customer demand efficiently - and all of this by using standard Microsoft Dynamics AX enhanced with the AXtension<sup>®</sup> AXcelerator<sup>®</sup> for Manufacturing and the eBECS Engineering Change solution. Learn how real-time insight, efficient document management, visual production planning, and streamlined engineering change processes add significant value to your manufacturing processes.

**Fri 17 Oct**  
09:30-10:30  
Room 106

## Understanding Lean Manufacturing with Dynamics AX 2009

See Lean Manufacturing in Microsoft Dynamics AX 2009 in action. This session will review the Lean functionality included in the standard Microsoft Dynamics AX 2009 and how it can support your Lean initiatives. See demonstrations showing a few of the major building blocks of Lean Manufacturing for AX 2009.

**Fri 17 Oct**  
14:15-15:15  
Room 132

**SEE OVER FOR NEWS of the Unique eBECS and AXtension  
Partnership for North America**

# ***eBECS announces partnership with AXtension across North America to enhance the capability of Microsoft Dynamics AX***

NEWS RELEASE: OCTOBER 2014

Multi-award-winning Microsoft Dynamics reseller, eBECS, which operates from offices in the UK, North America, Saudi Arabia and Jordan, has today announced its formal partnership with award-winning AXtension bv, an ISV that provides comprehensive, future-safe, add-on solutions - which are all Certified for Microsoft Dynamics (CfMD) - that enhance the capability of Microsoft Dynamics AX by improving key business-critical processes.

eBECS will take pole position in reselling AXtension to both Microsoft partners and end-users across North America. The partnership unites the extensive industry expertise of both companies, and it allows eBECS to enhance its core Microsoft Dynamics AX and Lean Thinking capabilities with specialist add-on solutions from AXtension to drive continuous improvement.

Stephen Wilson, Chief Marketing Officer at eBECS, comments, "eBECS is delighted to be working shoulder to shoulder with AXtension in such a powerful partnership. eBECS' core Microsoft Dynamics AX knowledge and its Lean manufacturing and engineering change solutions deliver tremendous value to our clients and this value can now be further enhanced with comprehensive solutions for document management, invoice processing, production planning, cost control, kitting and sales dashboards from AXtension. It is a truly complementary partnership that will deliver many business benefits to our clients."

Sandra van Leeuwen, Strategic Partner Alliance Manager at AXtension adds, "Our solutions are distributed exclusively through a network of highly trained and qualified resellers. We see in eBECS the right partner to bring the well-established AXtension solutions to the North American market: they understand the industry, have intimate knowledge of Microsoft Dynamics AX and, of course, share the belief that customers will see the positive return on investment that can be achieved through enhancing their most business-critical modules within Microsoft Dynamics AX. With AXtension, users can streamline their business environment and truly unleash their commercial potential."
