

# eBECS Training for Microsoft PowerApps and Microsoft Flow

Gain all the skills and confidence you need to create custom business applications using Microsoft technologies

## You will learn:

**How to get started on your first custom development**

**Which tools and templates to use to achieve your goals**

**Everything you need to know about the Common Data Service**

**How to ensure your new apps are secure and compliant**

**The best ways to integrate new apps with existing business systems**

## Learn how to automate your business processes, without writing code

## What are Microsoft PowerApps and Microsoft Flow?

PowerApps and Flow are two products that have been developed by Microsoft to help organisations develop custom business applications, without the need to write code. PowerApps provides a user-friendly development platform

for creating bespoke solutions, while Flow delivers over 150 pre-developed templates for processes ranging from setting up service notifications to synchronising files and data. Together, the two tools provide all the capabilities that organisations need to replace their time-consuming paper-based and spreadsheet-driven processes with simple applications that streamline business processes.

## Why attend an eBECS training course?

The eBECS training course for Microsoft PowerApps and Microsoft Flow has been specially designed to give customers not only the knowledge, but also the practical, hands-on skills they need to become competent and confident users. eBECS was selected by Microsoft to be a Launch Partner for PowerApps when this platform was first introduced, and to this day our consultants work closely with Microsoft's PowerApps developers in Seattle. We therefore have an almost unrivalled level of expertise in this area – which we look forward to sharing with you.

## The benefits

By attending eBECS training for Microsoft PowerApps and Microsoft Flow, you will be able to:

- Quickly gain the skills and knowledge you need to become a self-sufficient app developer
- Improve your understanding of the capabilities of PowerApps and Flow, so that you can develop better apps for your business
- Increase your productivity, with our tips and techniques for developing apps more quickly
- Deliver added value for your business with well-crafted apps that are secure, integrated and effective

# eBECS Training for Microsoft PowerApps and Microsoft Flow

Select eBECS to learn tips, techniques and hands-on skills from experts in Microsoft PowerApps and Microsoft Flow

## How is the training course structured?

### Part One: Essential know-how

The training course commences with an overview of Microsoft PowerApps and Microsoft Flow and introduces you to key features. The morning session also includes a detailed explanation of how to use the Microsoft Common Data Service to store and model the data for your apps, as well as set up role-based securities. You will explore the Microsoft App Creator and administration capabilities to gain a detailed understanding of how to build and manage new apps.

### Part Two: Hands-on labs

Your learning will continue in a demonstration session, when you will be able to gain inspiration from seeing apps successfully deployed in other organisations. Then, in the eBECS training labs, you will have the opportunity to create a fully operational app yourself, built using PowerApps, extended with Flow and connected to the Common Data Service. In this way you will gain hands-on skills under the close guidance of our experts and cement the knowledge you gained earlier in the day.

## Also available from eBECS

On-site  
PowerApps  
workshops

If you would like guidance on a specific development for your business, you can book an on-site workshop

eBECS FastApps
