

Microsoft Surface Hub from eBECS

Pricing Guide August 2017

The unique new team collaboration device

Microsoft Surface Hub is designed to advance the way your people and teams work together. It comes with Office apps like Word, Excel and PowerPoint, plus the OneNote whiteboard and Skype for Business. And with 'Ink' and 'Touch' features at its core, writing and drawing is as natural and fluid as pen on paper, while advanced touch capabilities allow multiple people to interact with the screen simultaneously.

A powerful return on investment (ROI)

A recent Forrester report on the 'Economic Impact of the Microsoft Surface Hub' found that it led to more successful meetings and larger deals – and could reduce meeting costs by over £100k per annum! And all for a relatively low investment. Alternatively, try Microsoft Surface Hub before you buy with our flexible rental options.
