

# eBECS Reporting-as-a-Service

Gain all the business intelligence reports you need for a fixed monthly subscription

## Reporting Challenges

**Urgent need for insight**

**Diverse reporting requirements**

**Overwhelming data volumes**

**Insufficient reporting know-how**

**Constant business change**

**Limited budget**

**Use evidence to make critical business decisions with greater confidence**

## Why choose a subscription service?

Organisations today have a vast amount of business and market information at their disposal, but they often lack the in-house expertise to transform this data into valuable business intelligence reports. Moreover, creating a range of reports for different groups of users within a business can be a time-consuming and costly undertaking, and it can take months to implement changes to reports, when business needs evolve.

eBECS has introduced its Reporting-as-a-Service offering to address precisely these challenges. For a simple, fixed, monthly subscription, customers gain the customised reports they need, as well as the flexibility to adapt these reports and create new ones, over time, at no additional cost. Most importantly, customers benefit from the support of some of the UK's most experienced business insight specialists, who can help them interpret and use their data more effectively to inform critical business decisions.

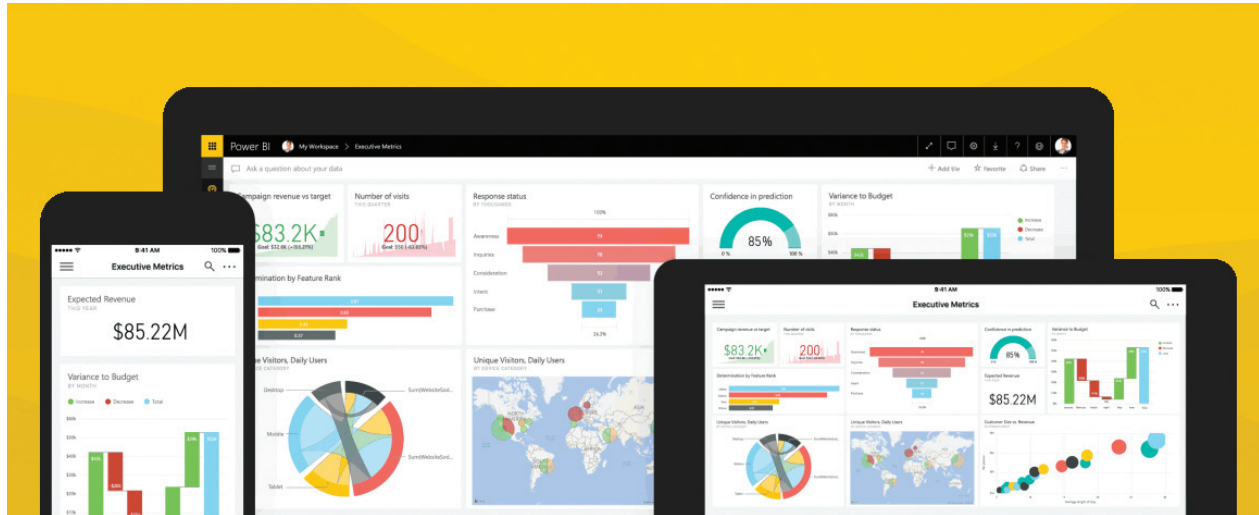

## The benefits

With Reporting-as-a-Service from eBECS, you can:

- Make better decisions, more confidently, with instant access to accurate, up-to-date business information
- Interpret business opportunities more effectively with clear visualisations of market trends
- Respond quickly to business change with fast access to new and revised reports
- Gain greater insight from your data assets, guided by business intelligence experts
- Relieve the pressure on your in-house teams, letting eBECS handle complex data management and report generation tasks

# eBECS Reporting-as-a-Service

Select eBECS for the hassle-free way to gain clear business insight

## How does the service work?

### Low cost set-up?

Business insight specialists from eBECS will work with you to deploy the out-of-the-box functionality, configure the reporting environment and get your reporting transformation started for an initial set-up fee of just £5,000. The eBECS Reporting-as-a-Service offering is built on the eBECS Analytics platform and Microsoft Azure Cloud, which is highly intuitive and easy for everyone to use without the need for long, costly training.

### Rapid time to value

Using out-of-the-box capabilities and standard content, eBECS will deliver your first business intelligence reports within weeks, enabling you to gain improved insight into your business almost immediately. Through eBECS, you will have access to the latest reporting techniques and technologies, and expert guidance on how to make optimum use of your reports. Your data will be displayed using best practice and industry-standard visualisations, dashboards and metrics, giving you a trusted version of the truth, accessible to employees across multiple departments.

### Flexible report updates

As part of the fixed, monthly fee, eBECS will adapt and expand your reports so that they continue to meet your needs, as your business evolves. Customers receive between five and twenty credits per month (depending on their level of subscription). One credit can be exchanged for a simple amendment to an existing report, while for three or four credits, eBECS will provide a brand new report. Credits can be rolled over for three months, giving customers the opportunity to either make quick changes or redesign their reports over a period of time.

## eBECS Reporting-as-a-Service features:

Rapid start-up	Report building
eBECS Analytics platform	Out-of-the-box content
Microsoft Dynamics reports	Training & enablement
Inclusive report updates	Expert support & guidance

## A Microsoft solution from a Microsoft Gold Partner

The eBECS Reporting-as-a-Service offering is designed specifically for organisations that use Microsoft business solutions, such as Microsoft Dynamics and the Microsoft Azure Cloud Services. Reports can be generated using data from any Microsoft system, as well as line of business applications, the web, big data, sensors, remote devices and more.
